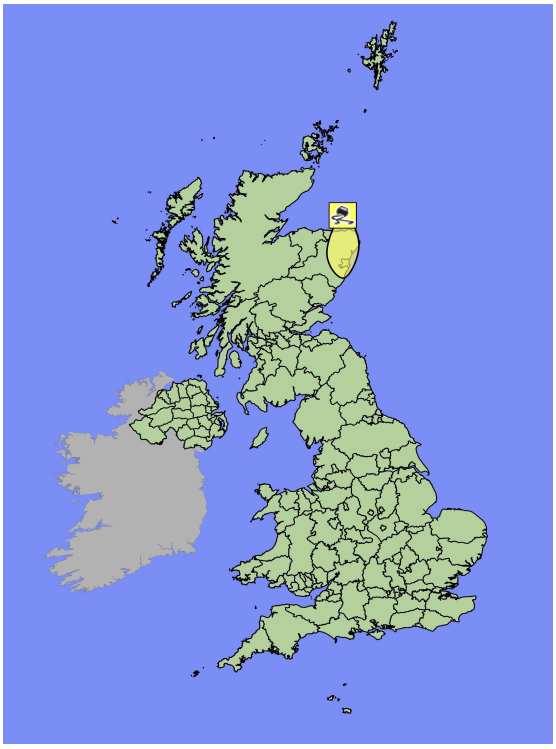
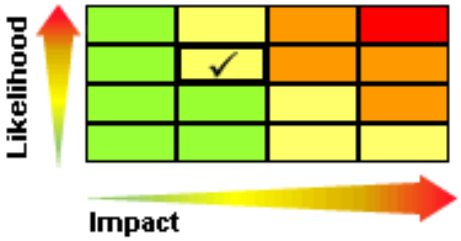
National Severe Weather Warning Service





Chief Forecasters Assessment
Showers are falling now, with reports of ice already, as temperatures hover close to zero. Ice may become more widespread as showers continue beyond midnight.

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **23:30 on Wed, 28th Nov 2012** until **11:30 on Thu, 29th Nov 2012**

Icy stretches are expected to form on untreated surfaces wet from late evening showers. Also the showers will continue into the early hours of Thursday before dying away, so even surfaces that have been treated may experience icy stretches if salt is washed away.

The public should be aware of the risk of ice on roads and pavements.
